# THE FLIPPED LEARNING

Non-classical learning method aims to improve learning practices inside and outside the classroom.

What is this learning method and how does it work?

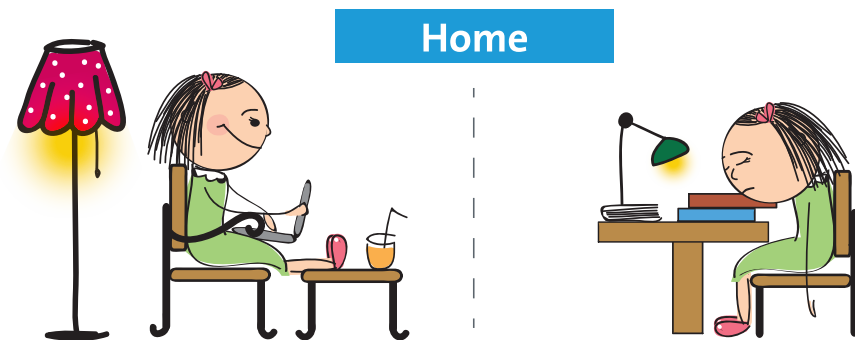

## What is the Flipped Learning?

The flipped learning inverts traditional teaching methods, delivering instruction online outside of class, moving activities and “homework” into the classroom.

## What a flipped learning model does?

Students watch lectures at home at their own pace. communication with peers and teachers via online discussions. Concept engagement takes place in the classroom with the help of the instructor.

## A theoretical framework

Educational technology and activity learning are two key components of the flipped classroom model. They both influence student learning environments in fundamental ways.

## How it works?

- Teachers create videos and upload them on Dardasa website.
- Students watch the 7-5 minute videos at home (or in school if they didn't have internet access at home).
- Class time for hands on activities, deepening concepts and useful feedback.

## Dardasa benefits:

### Student:

With Dardasa learning becomes more fun, no more boredom and worries. The student can learn anytime at any place. Dardasa enables the student to connect inside and outside the classroom with his classmates and teachers. Dardasa is a social learning community that is safe for all students.

### Teacher:

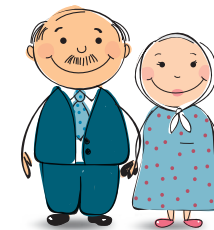

Dardasa enables teachers to turn the classroom environment into an interactive workshop which makes students positive participants and help them develop the 21 century skills.

With Dardasa the classroom management become more fun and easier. It also enables the teacher to connect with the teachers and educators community, exchanging experiences and success stories locally and globally. It also enables the teacher to deploy **flipped learning** which will give him/her free time inside the classroom to create activities, experiments and applications with students.

### Parent:

Dardasa enables parents to play a constructive role in helping their children succeed, they can follow-up with their children's school performance and they can know their accomplishments easily minute by minute. The site also enables parents to connect with teachers and school management to get their notes and feedback about the performance of their children.

With Dardasa no more suffering for parents and children alike with home teaching, private lessons and even homework because Dardasa implements **flipped learning**, the student can understand the lesson alone at home and do his assignments and homework at the classroom.

### School:

With Dardasa the school can evolve to reach the top rank in education and enhance the connectivity between home and the school. It also allows the school management to follow-up with the education process inside and outside the school.

Through **Academic Empowerment Program** which is offered by Dardasa, the school can get the guide lines, training the advice on the right methods to guarantee the success of implanting Dardasa at the school for academics, managerial and students.

The program also enables the school management in following up with Dardasa experience, measure its performance and outcome on scientific bases.
