A software for preparing lessons and capable on all interactive devices

Educational Apps

Using these fabulous apps will make your lesson full of activities that grab student's attention and make them eager to learn with a sense of fun and entertainment.

Web Apps

Using the internet is safer than before with our google images, browser, Wikipedia and youtube. In the past, you needed to get out of the software to search and download the content you need to include in your lesson but now all this can be done within ketabstudio 4 without leaving your lesson.

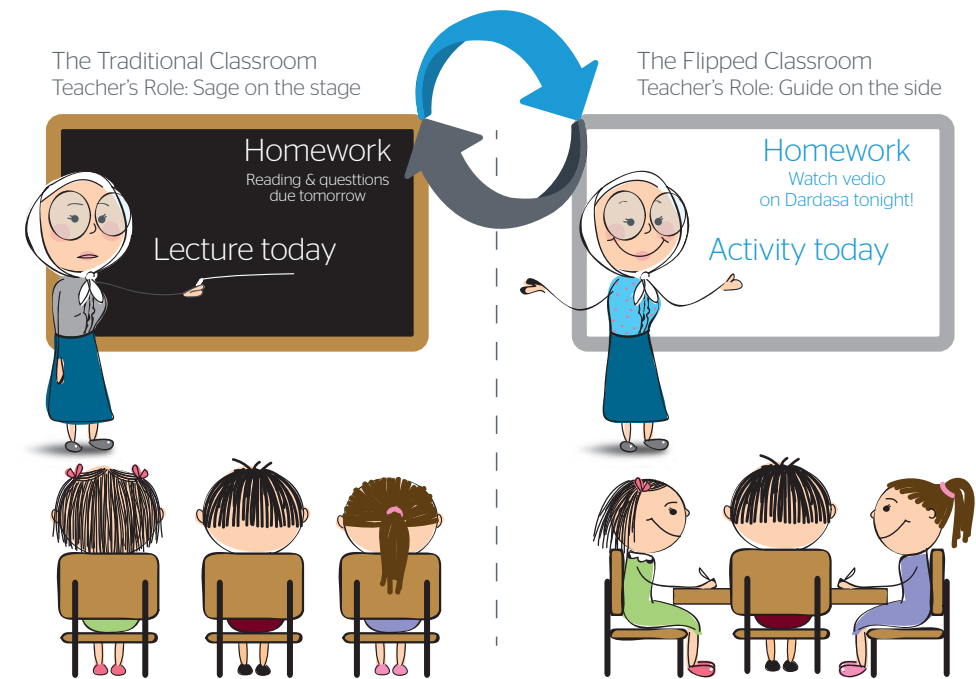

Just Drag and Drop

We designed it in a way that makes it perfect for teachers to use. You can search for whatever comes to your mind with our web Apps and when you find it just drag and drop it.

How does the publisher apply Flipped Learning method?

It's an educational method where video - which can be taken in many different ways, is used as an educational material, in order to reduce the time of explaining the main knowledge concepts, for the student to obtain as much support as possible from the teacher and his colleagues.

Publish

Pen recorder and camera recorder also screen recorder, all of them are magnificent tools to apply this revolutionary method in learning. It makes it easier for the teacher to prepare and record short lessons where the entire concept is explained in ketabstudio 4 with its brilliant helpful tools and can be saved without exhausting the memory size of your PC or re-acting its performance. And when your brilliant lesson is ready! Publish is the next step which is provided by ketabstudio 4 in order to publish your lesson on the web so your students will be more satisfied with your amazing lessons.
